## Overview

**AS-server** is an easy to handle Windows program you can install on any Windows 7, 8 or 10 PC. Both 32 bit and 64 bit Windows is supported.

It makes all the players from Creator project's accessible to your whole office.

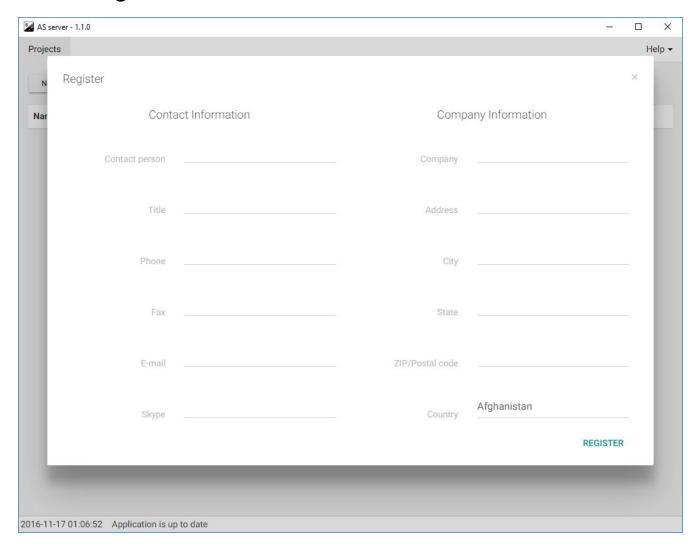

As long as the **AS-serve**r program runs, your colleagues from your office can access the players. It provides access to many different projects players at the same time.

All it needs is the Project folder (out/Demo) with the processed project:

The folder can still be on the processing PC or copied to any other PC. We recommend to copy it to another PC.

# Licensing

When starting AS-server the first time the **Register** popup will be displayed. Fill it in and click **Register**.

AS-server then will work for 21 days for evaluation with all the features available. There are no limitations at all.

#### **Purchase and Register**

Contact Applied Streetview to license AS-server.

You will get a key for your PC.

In the menu click **Help -> Add activation key**.

Paste the activation key and click the **Register** button.

#### Offline registration

In case there is no internet connection at the PC you want to install AS-server, instead of the **Register** button you will see a **Register Offline** button.

Click on the **Register Offline** button and follow the instructions from there on how to get your license.

#### Menu - Help - License Details

Shows the type of the licence, the end of the evaluation period and the end of update period:

#### **Evaluation Licence:**

#### Payed for licence:

#### Menu - Help - Add activation key

Opens the license **Register** popup. Use this to update your evaluation license to a purchased license or replace current license with a new one - for example when **Update period** ends.

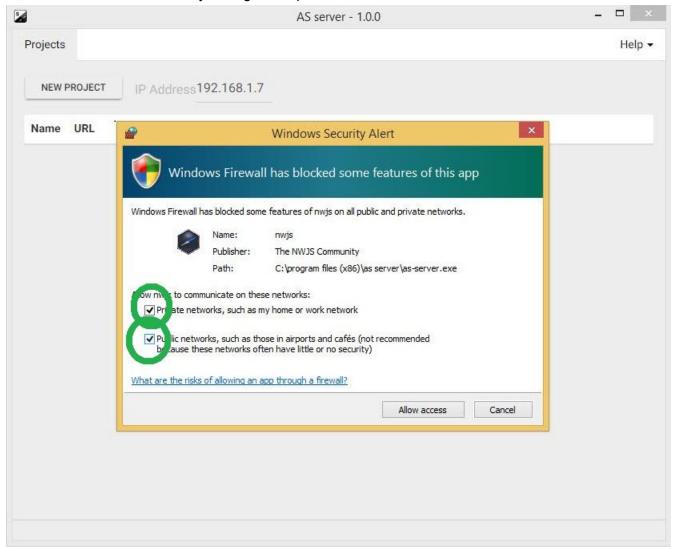

## Installation

Check and download the newest AS-server version:

http://www.applied-streetview.com/as-server/

Install it.

Allow access to all networks by ticking both options.

Click Allow access button.

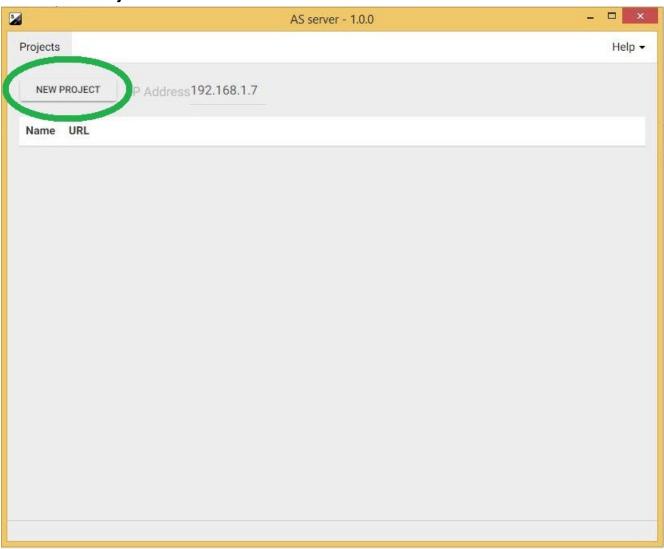

# **Add Projects**

AS-server provides access to many projects players at the same time

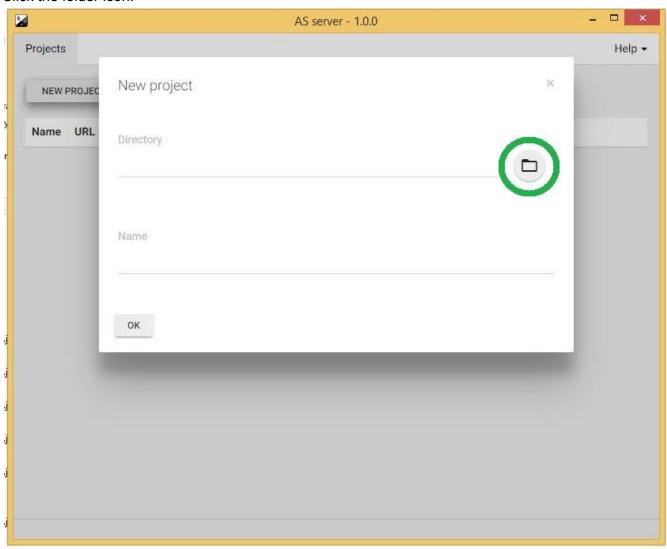

To add a project:

Start AS-server.

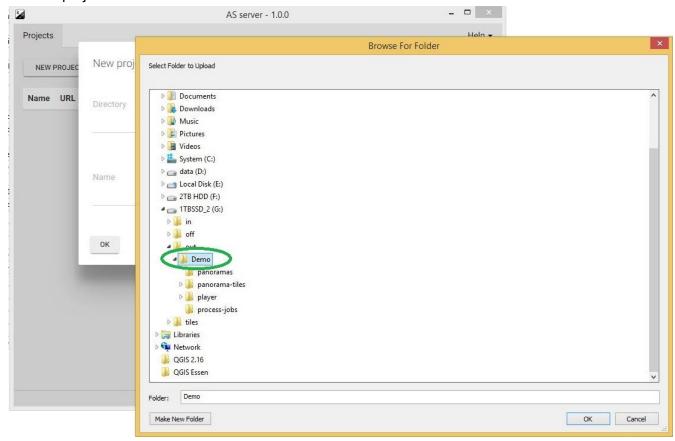

Click the **New Project** button:

### Click the folder icon.

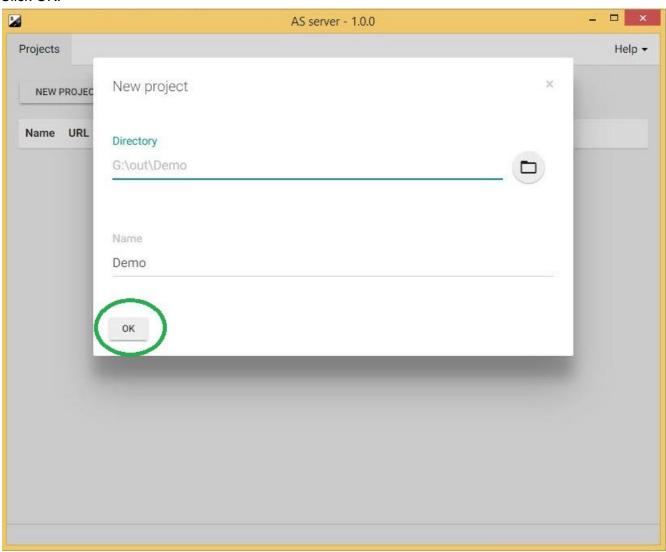

## Pick the projects folder

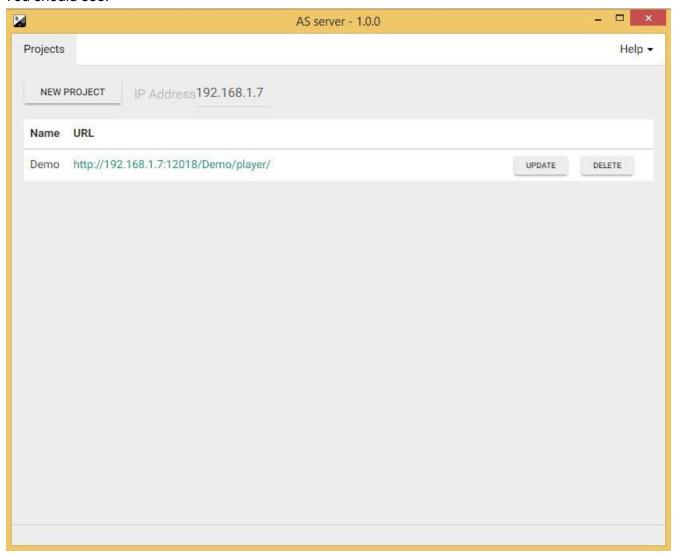

Click OK.

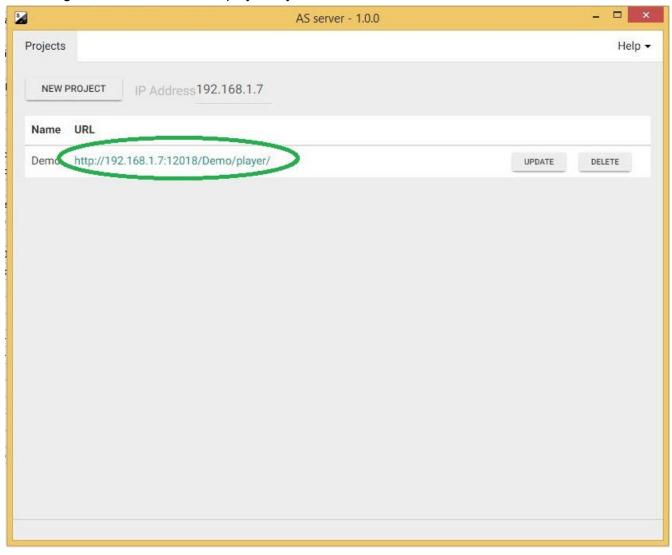

## Click OK.

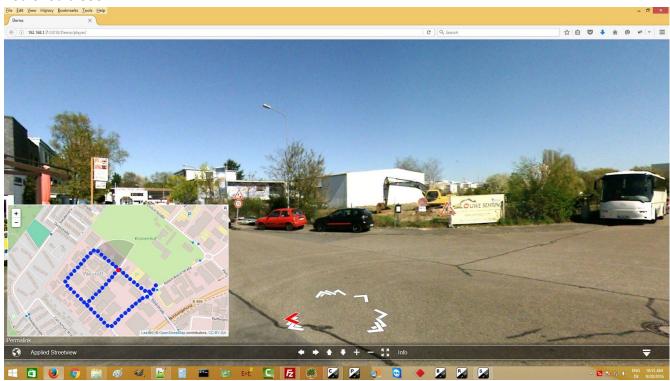

## You should see:

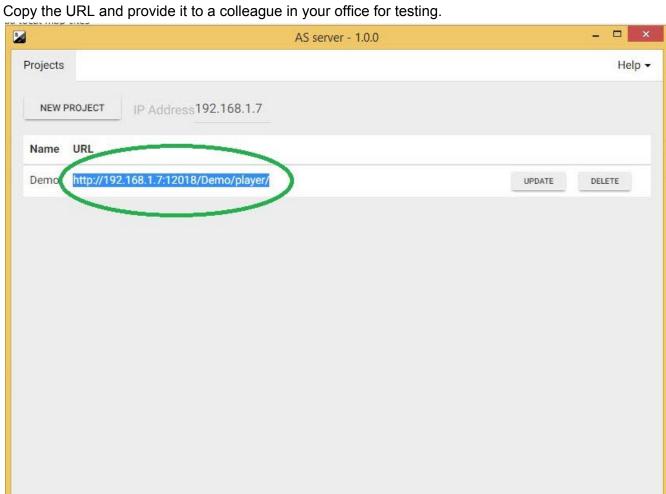

## Click the green URL to launch the player in your own PC's browser

## You should see:

If it works, pass the URL to the other colleagues in your office.

# How to make a change?

If you like to make a change to a project, do it in Creator.

Make sure to use the **Overwrite** option when recreating e.g. the player.

Then click the **Update** button in AS-server. Open the project in the browser. **Reload the browser.** 

You now should see the change.

# What if does not work?

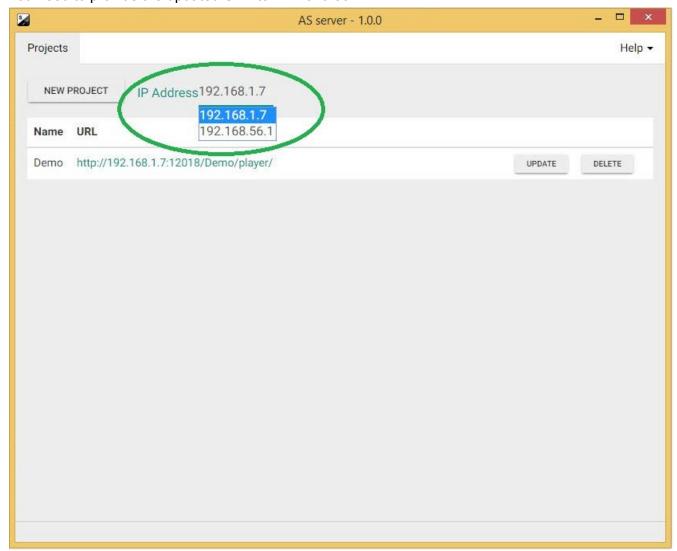

#### A) Try a different IP address

Your PC can have many IP addresses. AS-server uses the most likely one.

And lists all other IP addresses it finds.

Try the other IP addresses from the list one-by-one, and test them with your colleague.

You need to provide the updated URL to him for that.

B) Click Update.

# What this is not

AS-server is meant for a small number of viewers only.

Safety and security is not our concern.

Do not use this tool with critical infrastructure!

# What if we need more?

You should install the project's player to a real web-server.

We recommend an off-the-shelf Linux server with Apache and MySQL and the usual administration tools like cPanel and phpMyAdmin.

See the Creator page for the **Creator Quick Starter Guide** and the **Creator Manual** for how to do this:

http://www.applied-streetview.com/processing-program/

# Support

Hint:

We can not help with your office's network configuration. Get your IT departments help for that.

Support is provided for the newest program version only. Check and update first if necessary.

http://www.applied-streetview.com/as-server/

Support is available in English language only.

To report a malfunction, please use the  $Menu \rightarrow Help \rightarrow Support$  function of the program. It automatically attaches the log file and allows you to attach additional files like screenshots of the issue you are facing.

You are welcome to send an additional email or to Skype us.
