# Overview

The Android player works 100% offline.

It needs no internet access at all.

All of the streetviews and even the map-tiles can be saved to the tablet.

Ideal for demos, sales shows and tactical teams.

# Portrait and Landscape

# Publishing

## Creator 3

### Publish

In the **Process** tab select **Android Player** tab then click on **Start process**.

### Add map tiles

Map tiles are added automatically when the project is set to a local map tiles folder.

See: Map page: You companies map files

A .zip archive will be created.

### Copy to the tablet

Copy the .zip archive to the tablet E.g. into the Downloads folder.

Open the Android Player app and follow the instructions on the [Projects](#) page.

## Creator 5

### Publish

Open the **Publish** page.

Make sure the **Create streetview-tiles** checkbox is checked.

### Add map tiles

Adding map tiles is optional.

Without them it needs a working internet connection to download map-tiles when viewing.

Create map tiles with the [Map Downloader](#) program. Or use your own map tiles.

Copy the folder with the map tiles into the **project folder** and rename it to **maptiles**.

### Copy to the tablet

Copy the **projects folder** to the tablet. The **panoramas** folder is not needed.

To speed up the copying you should zip the folder.

Unzip on the tablet with the **Files** App. (More -> unzip).

Open the Android Player app and follow the instructions on the [Projects](#) page.

# Projects

Click the **New Project** button and pick the unzipped folder of the project to add it. The project should appear in the list. Click on the **project name** to open the Player.

If the project is located on an external SD card click on the SD card icon when picking the folder.

# Player

Opens the player.

You can bookmark a streetview with the current viewing direction. Use the bookmark icon in the top left.

# Bookmarks

Displays a list of all the projects and their bookmarks.

Click on the bookmark name to open it's associated project. Then open a bookmark.

Click on the  button to delete a bookmark.

Use the **Export/Import** buttons at the bottom to backup and restore your bookmarks.

NOTE: Bookmarks are not auto generated for projects published with Creator 5.

In the player you can bookmark a streetview and the viewing direction with the bookmark icon in the top left.

# About

Version 2.3.0

Applied Streetview

# Support

Support is provided for the newest Android Player app only.

Support is available in English.
